# FIREARM COMPONENTS & ASSEMBLIES

For over 60 years Star-Glo Industries (SGI) has been providing its manufacturing services to the Firearms industry. Since the beginning, the SGI mission has been to exceed its customer's expectations of quality, price and delivery of **precision machined parts, plastic and rubber components, weapon systems and assemblies**. Our state-of-the-art Swiss Screw Machining Division enable us to tackle even the most complex components in any and all alloys.

From **Firing Pins to Trigger Guard Assemblies to Pistol Grips**, SGI's comprehensive services provide effective end-to-end solutions for your next generation manufacturing challenges.

## BUFFER ASSEMBLIES

Our distinctive mix of capabilities in metal machining, rubber molding, plastic molding and product assembly make us uniquely qualified to produce Buffer Assemblies. Our Heavy Buffer bodies are CNC machined from solid Aluminum bar stock for strength and durability. Inner weights are cut from Tungsten bar stock or Tungsten Carbide. Our lab certified Buffer Buttons perform in the harshest environments.

Whether it's a standard Carbine buffer or a H3 tungsten Heavy Buffer, let us show you what SGI can do for you!
